Request a change

Accommodations vs. Modifications

- Changes in course/test
 - ✓ presentation
 - ✓ location
 - ✓ timing
 - ✓ student response or other attributes

- Necessary to provide access for a student to participate

Accommodations vs. Modifications

Accommodations

- ✓ Available to any student (to allow the student to complete the same work as others)
- ✓ May be curricular, environmental, or testing adaptation
- ✓ Does not fundamentally alter the general curriculum

Modifications

- ✓ A Special Education mechanism: written into the IEP
- ✓ Represent changes to content, methodology or performance
- ✓ Adaptations that result in a fundamental alteration of the standard

IEP

- States how a child's disability affects ability to progress in the general curriculum
- Identifies specially designed instruction necessary to facilitate access to the general curriculum
- Includes measurable annual goals and reports progress on these goals at the same frequency as non-disabled peers
- Reasonably calculates measurable educational benefit

Implementation of IEP

School immediately implements an accepted IEP

- Parents have 30 days to sign the proposed IEP
- 5 days to attempt to resolve disputes

Individualized Education Program				
RMATION	Age:	Gender:	Meeting Date:	
Birth Date: 05/15/2009	3	M	05/01/2013	
Evaluation: 05/11/2012		Number: ,		

Free & Appropriate Public Education

- Not best education, but rather: “appropriate education”
- All programs and services, including extra-curricular activities that are available to non-disabled students are also made available

Least Restrictive Environment

- Every effort is made to provide specially designed instruction in the general Ed classroom
- Maximize integration, minimize separation
 - Special classes/separate schooling occurs only when the nature or severity of the disability is such that education in general education with the use of supplementary aids and services can not be achieved satisfactorily

Section 504

- Provide students with disabilities with...
 - * Equal access to educational programs, services etc.
 - * Same opportunities as their non-disabled peers (FAPE)
 - * Equal opportunity, equal access, average standard
 - * Allow student to function on level with his/her peers
 - * Does not require specialized instruction

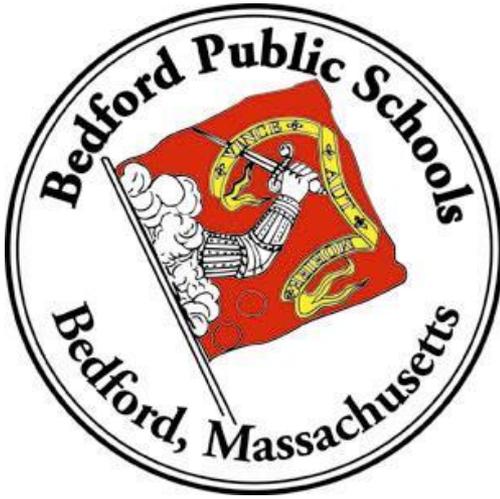

Section 504

➤ Teacher Responsibilities

- ✓ Serve on Team
- ✓ Implement Accommodations

Remember that failure to implement a 504 is a “personal liability” issue.

603 CMR 46.00

Regulations Overview

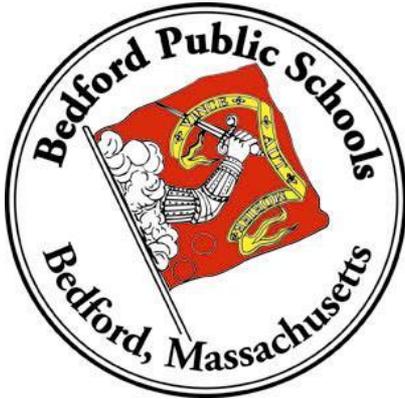

Seclusion & Restraint Regulations and Procedures

The Regulations Ensure That:

Physical restraint is an emergency procedure of last resort and is prohibited except when:

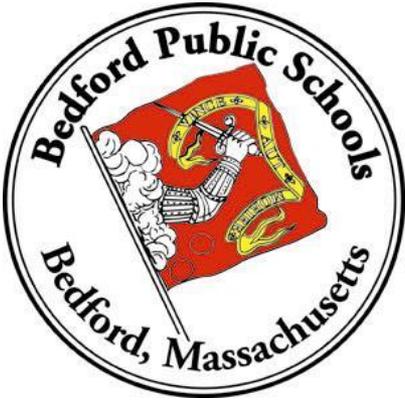

- 1) A student's behavior poses a threat of assault, or imminent, serious, physical harm to self or others and
- 2) The student is not responsive to verbal directives or other lawful and less intrusive behavior interventions, or
- 3) Such interventions are deemed to be inappropriate under the circumstances

REVISED Regulations, effective January 1, 2016

Several changes have been made to the regulations that will go into effect as of January 1, 2016. These include:

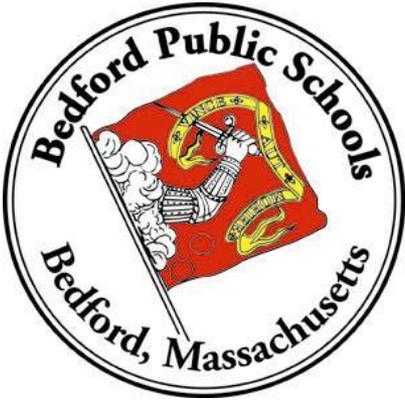

- Revised definitions of restraint
- Addition of the definition of “time out”
- New prohibitions on the use of prone restraint
- Revised/additional reporting requirements after restraint has been used

Restraint Defined

The regulations define **physical restraint** as:

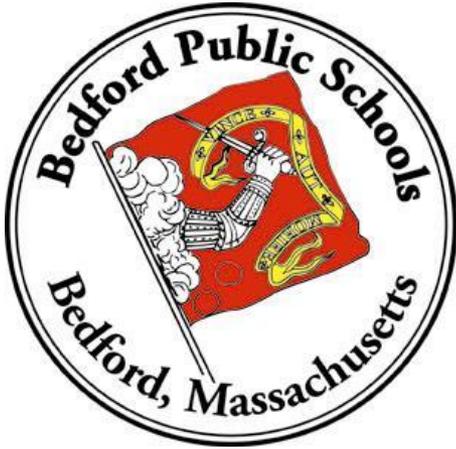

“Direct physical contact that prevents or significantly restricts a student’s freedom of movement. Physical restraint does not include: brief physical contact to promote student safety, providing physical guidance or prompting when teaching a skill, redirecting for attention, providing comfort, or a physical escort.”

Physical Escort Defined

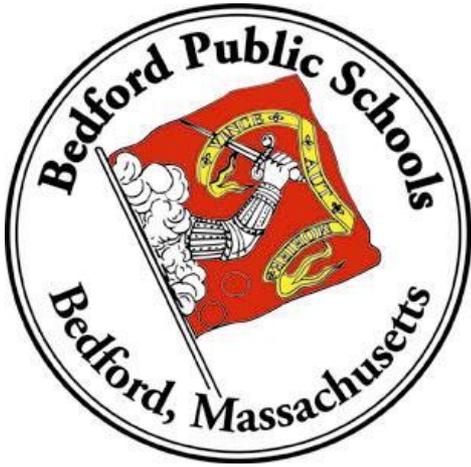

The definition of physical restraint is also made distinct from a **physical escort** which is defined as:

“a temporary touching or holding, without the use of force, of the hand, wrist, arm, shoulder, or back for the purpose of inducing a student who is agitated to walk to a safe location.”

What is Permitted Under the New Regulations?

- Brief physical contact to promote student safety (such as guiding a student or re-directing a student)
- Providing physical guidance or prompting when teaching a skill
- Redirecting attention (such as to a shoulder, face or torso)
- Providing comfort
- Physical escort that does not involve force

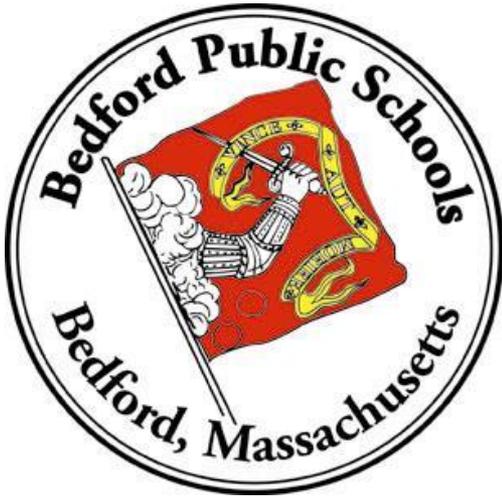

Inclusionary vs. Exclusionary Time-Out

The state has further defined “time-out” procedures to assist Districts in understanding how to use time-out using the least restrictive methods:

• **Inclusionary Time-Out**: a behavior support strategy that allows the student to remain fully aware of the learning activities of the classroom. This can include: "planned ignoring," asking students to put their heads down, or placing a student in a different location within the classroom (this does not include walled off "time-out" rooms located within the classroom)

Inclusionary vs. Exclusionary Time-Out

- **Exclusionary Time-Out**: a behavior support strategy that includes the removal of a student from the learning environment. This should only be used when the student is displaying behaviors which present, or potentially present, an unsafe or overly disruptive situation in the classroom. Staff-directed exclusionary time-out should not be used as a method of punishment for noncompliance, or for incidents of misbehavior that are no longer occurring.
- Exclusionary time-out **cannot** include the use of a **locked** door! Closed doors are permitted as long as staff are able to continuously monitor the student at all times.

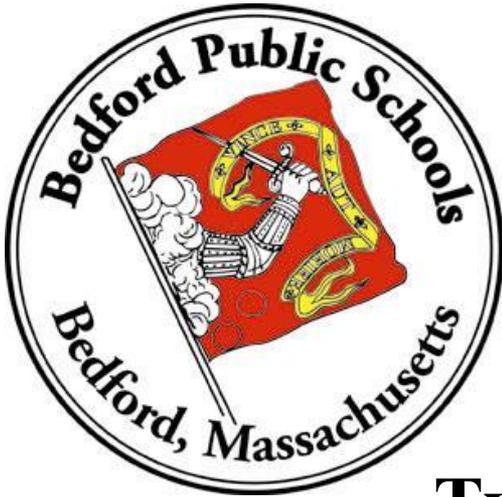

Further Restrictions on Time-Out

- If an exclusionary time-out period lasts 30 minutes, the Principal must approve the continuation of time-out based on the student's continuing agitation
- The time-out procedure should include seeking Principal's approval prior to the 30 minute timeframe in order to proceed with the time-out

A Few Words About Time-Out

- A student may choose time-out or a staff member may direct a student to the time-out area, for the purpose of calming
- Any student removal from the instructional area due to escalated behaviors is considered to be a “time-out” (e.g. guidance office, learning center room). It is not limited only to spaces labeled as a “time out” area.
- Any student in a time-out space must be continuously observed by a staff member
- Staff shall be with the student or immediately available at all times
- The space must be clean and safe

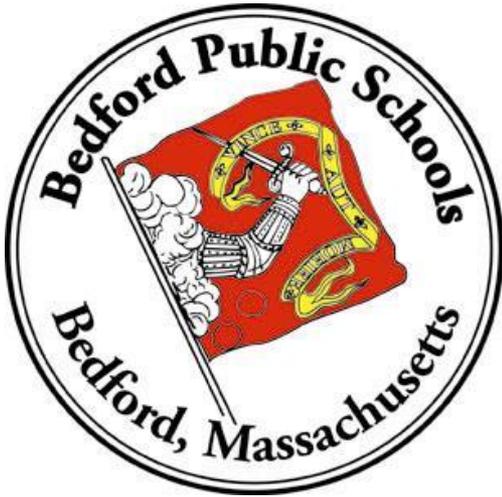

Considerations to Administering Physical Restraints

Types of Restraints Permitted

- Only physical restraints, consistent with 603 CMR 46.00 are permitted to be used in schools.
- Mechanical restraints, medication restraints, and seclusion are **prohibited** in public education programs!
- Additionally, prone restraints (where student is placed laying face-down on the floor) are also **prohibited**, (except in rare circumstances where there is explicit written consent to do so).

What Should You Do If Faced with an Emergency?

1. Use only the amount of force necessary to move or contain the student and prevent injury or harm to the student or others
2. Move the student to a close-by safe, protected area. This area should be free of breakable materials or materials that could be thrown
3. Have someone call for the Restraint Team
4. If possible, have a partner help you escort the student and then remain with you and the student until the Restraint Team member(s) arrive

Who May Do Physical Restraints?

- Only staff members who have received in-depth training (CPI) are authorized to serve as a school-wide resource to assist in proper administration of physical restraint
- **However, this does not preclude a teacher, employee or agent of a public education program from using reasonable force to protect students, other persons or themselves from assault or imminent, serious physical harm.**

Enhanced Lockdown- A.L.I.C.E

ALICE Lockdown

ALICE is an acronym for the 5 steps you can utilize in order to increase your chances of surviving a surprise attack by an Active Shooter. It is important to remember that the ALICE response does not follow a set of actions you “shall, must, will” do when confronted with an Active Shooter. Your survival is paramount in this situation. Deal with known information and don’t worry about unknowns. You may use only 1 or 2 parts of the response plan or you may have to utilize all 5. In this type of incident, your perception is the reality and you will be deciding what the appropriate action for you to take is.

1) ALERT – Can be anything.

- Gunfire
- Witness
- PA Announcement
- Phone alert

2) LOCKDOWN – This is a semi-secure starting point from which to make survival decisions. If you decide to not evacuate, secure the room.

- Lock the door.
- Cover any windows in the door if possible.
- Tie down the door, if possible, using belts, purse straps, shoe laces, etc.
- Barricade the door with anything available (desks, chairs, etc.).
- Look for alternate escape routes (windows, other doors).
- Call 911.
- Move out of the doorway in case gunfire comes through it.
- Silence or place cell phones on vibrate.
- Once secured, do not open the door for anyone. Police will enter the room when the situation is over.
- Gather items to defend yourself (coffee cups, chairs, books, pens, etc.) and mentally prepare to defend yourself or others.
- Put yourself in position to surprise the active shooter should they enter the room.

Enhanced Lockdown- A.L.I.C.E (cont.)

3) **INFORM** – Using any means necessary to pass on real time information.

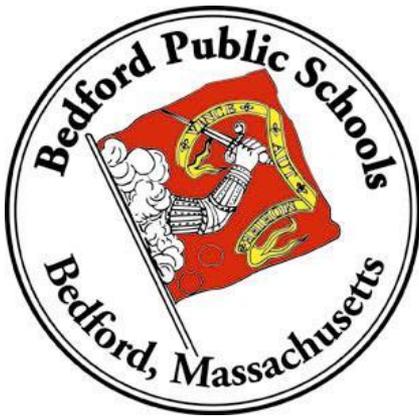

- Given in plain language.
- Can be derived from 911 calls, video surveillance, etc.
- Who, what, where, when and how information.
- Can be used by people in the area or those who enter the area, to make common sense decisions.
- Can be given by “Flash Alerts”, PA Announcements or Police Radio speakers.

4) **COUNTER** – This is the use of simple, proactive techniques should you be confronted by the Active Shooter.

- Anything can be a weapon.
- Throw things at the shooter's head to disrupt their aim.
- Create as much noise as possible.
- Attack in a group (swarm).
- Grab the shooters limbs and head and take them to the ground and hold them there.
- Commit to your decisions when employing counter strategies.
- Run around the room and create chaos.
- If you have control of the shooter call 911 and tell the police where you are and listen to their commands when officers arrive on scene.

5) **EVACUATE** – Remove yourself from the danger zone as quickly as possible.

- Decide if you can safely evacuate.
- Run in a zigzag pattern as fast as you can.
- Do not stop running until you are far away from the area.
- Bring something to throw with you in case you encounter the active shooter.
- Consider if the fall from a window will kill you or cause significant physical harm/death.
- Break out windows and attempt to quickly clear glass from the frame.
- Consider using belts, clothing or other items as an improvised rope to shorten the distance you would fall.
- Hang by your hands from the window ledge to shorten your drop.
- Attempt to drop into shrubs, mulch or grass to lessen the chance of injury.
